

Infinitesima Announces Advisory Board Appointment

*Infinitesima appoints semiconductor industry veteran
David Bakker to its Advisory Board*

Infinitesima Ltd., manufacturer of the VideoAFM™, announces the appointment of David Bakker to its advisory board. David has had a successful 20 year career in the semiconductor industry having spent 15 years at KLA-Tencor where he was the General Manager of the eBeam Review division and Vice President of Corporate Business Development. Before working with KLA-Tencor, David spent time in the semiconductor fabrication businesses of Digital Equipment Corp. and Bell Laboratories.

Jeff Lyons, Chief Executive Officer of Infinitesima said, "We're very pleased David Bakker has agreed to join our Advisory Board. Dave brings strong understanding and credibility within the semiconductor capital equipment industry to the company. He is a successful individual with deep experience and will help us as we develop our plans for the next phase of the company's growth."

David Bakker commented, "Infinitesima's technology is an exciting breakthrough in high speed imaging at the nano-scale. This technology will open up numerous production applications for advanced imaging in the semiconductor industry and I'm happy to be working with Infinitesima at this stage in their development."

Infinitesima:

Infinitesima is the developer and manufacturer of the VideoAFM™ and focuses on high-speed imaging and metrology techniques using scanning probe techniques. The VideoAFM is distributed by KLA-Tencor in North America and Europe and is used by researchers in nano-scale imaging applications.

The company is located in the Oxford Centre for Innovation in the historic city of Oxford. Oxford is located northwest of London and is a centre of advanced technology business in the United Kingdom.
